Perfection for your Parking

Quiet, fast, safe - this is what all of our **special parking doors** have in common. They are also characterised by their **reliability** and a **high number of operating cycles**. Nevertheless, should a malfunction occur, our service technicians are quickly on site. The doors primarily prevent **unauthorised access** and ensure **lower cleaning costs**, because the door systems keep paper waste out. They also have a range of **optional extras**: while viewing panes provide an additional light source, ventilation panels improve air circulation. It is also possible to install a **visually matching pedestrian door** next to the actual door.

In addition, the different models **individual features** such as compact dimensions for tight installation spaces or burglar-resistant equipment. EFAFLEX offers the right door for every situation.

Our Special Doors for Parking Garages

The right door for every situation!

Your advantages with EFAFLEX:

- Up to 250,000 operating cycles per year
- Reliability combined with fast service response times
- Optional thermal insulation door leaf
- Door slats can be adapted to match the facade colour
- Large range of pulse generators
